DURABILL DUoS Billing System

DURABILL

The leading DUoS billing system for the GB electricity market combining multi-distributor, multi-GSP group functionality with flexible tariff structures and a proven calculation engine. DURABILL delivers the most powerful, reliable and scalable solution available today.

KEY FEATURES

- CDCM and EDCM compliant
- Multi-Distributor, multi-GSP Group
- Flexible tariff structures, including NHHSC de-linked and default tariffs
- Multi MPAN site and complex MPANs billing
- HH & NHHSC IDNO billing
- MAP & MAM billing
- Automated MPRS Interface and reconciliation
- Accounts System interface
- Credit Management module
- Extensive suite of Control, Management and Regulatory reports
- Integration with Crystal Reports and Business Objects
- Comprehensive audit trail

System Pedigree

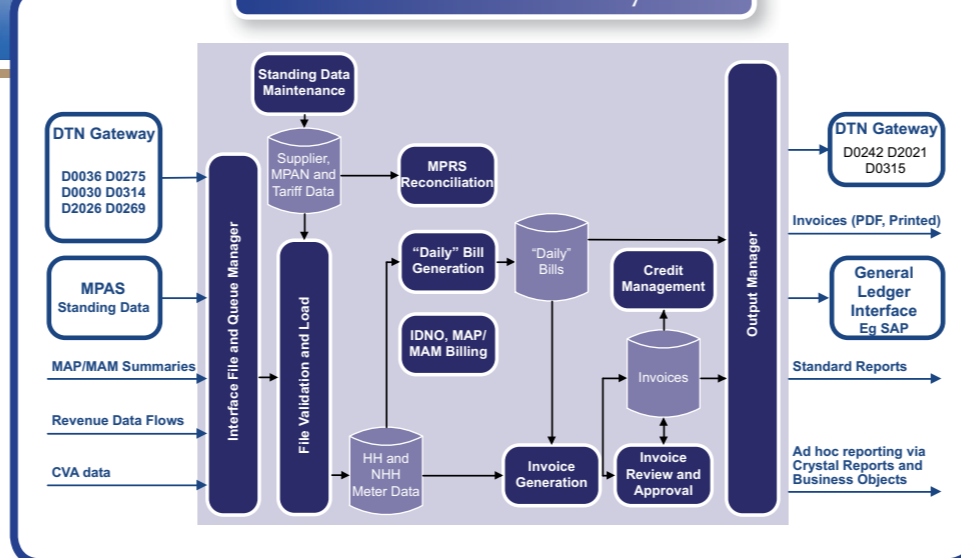

The product was designed and is supported by an expert team with over fifteen years of continuous DUoS and general LDSO experience. DURABILL boasts strong credentials as the modern, flexible, low risk choice with a proven operational track-record of billing a substantial proportion of GB MPANs.

Billing Accuracy and Speed

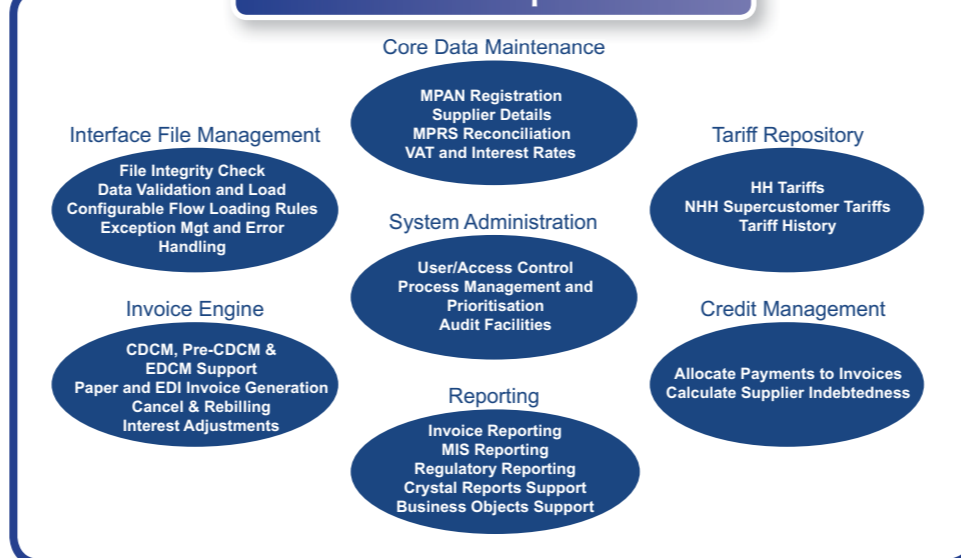

The core tariff logic (covering all existing GB tariffs) has consistently produced reliable, precise invoice calculations over a ten year period.

Billing is a rapid end-to-end process, with typical billing runs taking less than one hour to complete.

Product Functionality

Product Components

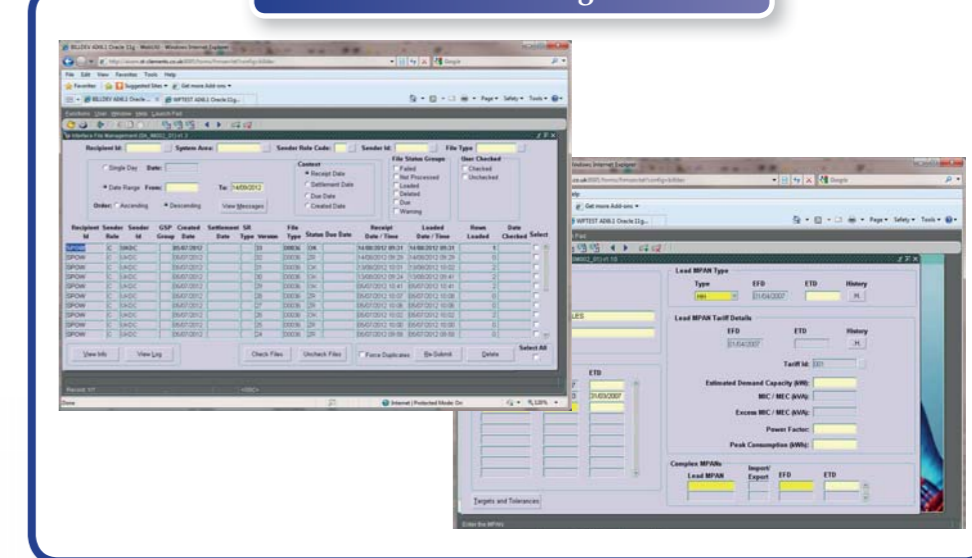

Low Lifecycle Cost

Customers have the opportunity to share the cost of mandatory and optional enhancements with other customers via a managed User Group.

Support Services

St Clements provides a full system support service from its in-house DUoS team, including on-going industry change monitoring and impact analysis.

Screen Design

Data Migration

St Clements has the proven toolkit, processes and expertise to safely migrate your billing data from legacy systems, providing total continuity between historic and future billing, with no interruption to live billing.

Integration Services

St Clements provides a full set of implementation services and the system can be tailored to meet bespoke functionality, reporting and interface requirements. Full product training (both business and technical) is also provided.
